

Pernod Ricard Winemakers

Open Up Our World of Wines

Environment Policy – Australia and New Zealand Operations

We will conduct our operations to protect and improve our environment by focusing on the following priorities:

1. Governance – Ensuring regulatory compliance and making informed environmental decisions at a senior leadership level
2. Supply Chain – Engaging our supply chain partners on environmental matters
3. Resource Stewardship – Preserving resources for future generations
4. Brands and Consumers – Using our leadership position to leverage broader environmental gains

We commit to:

- Identifying, understanding and creating mitigation strategies to our key risks both to and from the environment
- Ensuring we have governance systems in place to ensure compliance with regional, national and internal requirements
- Ensuring all staff are aware of our environmental aspirations and responsibilities, and continually seeking to improve our systems and performance
- Maintain key performance indicators to track progress against fundamental targets for water, energy, waste and greenhouse gas emissions
- Preventing pollution, protection of local ecosystems and improving biodiversity
- Demonstrating stewardship in agriculture through sustainable agricultural practices on our own farms and those of our suppliers
- Ensuring raw materials, ingredients and additives are sustainably and ethically sourced
- Ensuring sustainability is a key consideration in all new and existing packaging design

The Environment policy shall be communicated at all levels throughout our Pernod Ricard Winemakers Operations and made available to external interested parties via our public web site. The policy will be supported by specific site measures and continuous improvement of the environmental systems.

Brett McKinnon
Global Operations Director
